Elaine N. Marieb, Suzanne M. Keller : Essentials of Human Anatomy Physiology (12th Edition) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Essentials of Human Anatomy Physiology (12th Edition):

I am hoping I can clear up some confusion. I just received the "Human Anatomy Physiology, Books a la Carte Plus MasteringAP with eText -- Access Card Package (9th Edition)". This package came with the Human Anatomy Physiology textbook, A Brief Atlas of the Human Body, Interactive Physiology 10-System Suite (CD ROM), and the Student Access Code for Mastering AP. If you need the whole package, this is the one to order. Also, it is important to note that the textbook comes 3-holed punched and you will have to put the pages in a 3-ringed binder. This book does not have a binding. I personally like this idea because if I know that we are going to be working on chapters 2 and 3 in class, then I only have to bring chapters 2 and 3 to class. I don't have to lug around the whole book. Also, it might be important to note

that I ordered this book directly from and not from someone who is using to sell their book. If you order the hardcover book, you will only receive the textbook. The hardcover book (at the time of this review) does not come with the Atlas, CD ROM, or the Access Code. When you read reviews, make sure to look at the review carefully to see exactly which book/package is being reviewed. When you look at the reviews for "Human Anatomy Physiology" it will show reviews from people who received the hardcover book, the kindle book, and the 3-holed punched book. These reviews are all mixed together. The review will tell you exactly which book/package is being reviewed. Personally I think this makes it very confusing but if you look carefully you will find the information you need. UPDATE as of 1/30/2013 I have just noticed that is now selling a loose leaf edition without the full package. When ordering make sure you order "Human Anatomy Physiology, Books a la Carte Plus MasteringAP with eText -- Access Card Package (9th Edition)" if you need the full package. If it doesn't list "Mastering AP with eText - Access Card Package" in the title then you are not going to receive the full package. Also, it seems like is making it more difficult to actually find this full package. If you search for just "Human Anatomy Physiology", this full package is not going to come up in the search. However, if you copy and paste the full title: "Human Anatomy Physiology, Books a la Carte Plus MasteringAP with eText -- Access Card Package (9th Edition)", you should be able to find the correct package. I hope you find what you need. Now that I have started my class that uses this book, I can now comment on using the Loose Leaf version vs a Hardcover book. Overall I do like that I can take a few chapters to class versus taking the whole book. Its much lighter and I enjoy that. The only bad thing I have found about having the loose leaf version is that you have to be more careful with the pages. The whole book is 3 holed punched and needs to be put in a 3 ring binder. When turning the pages, if you aren't careful, you can tear one or two of the holes on a page. It's usually nothing a little tape couldn't correct but if you are the kind of person who is rough on their books, turns pages aggressively, throws their books across the room, then you might want to invest in the hard cover book. 193 of 196 people found the following review helpful. fantastic book, but read my review first By Validus I purchased this book a few semesters ago and it is a great text book. This text book you will want to keep for future references. With that said.. Do yourself a favour and just get the past edition. I returned my 9th edition. I just do not see the justification to charge someone almost \$200 for a new book when the previous edition is almost the exact same, with just replacing of pictures. The 8th Edition can be purchased for less than \$15 bucks here on (ISBN-10: 0805395695). I am pretty certain that most college students are pretty much on the verge of being broke, or soon to be for that matter. Always try to get the previous edition if you can, your save a lot of money, around 1/5 the price. These publishers just drive me nuts, I understand they need to make money, but come on, most of these books are never completely rewritten and they come out with a new edition every 2-3 years and those editions like this one, are almost exactly the same, except for replacement of pictures and a few updated stories/examples. It seems crazy how a book that is just two years old seems to be considered no longer usable.--*Update*: For most AP students, your cover the first chapter all the way to the nervous system. In AP II your probably start with the Endocrine System. Your professor may require you to get Mastering A P. This requires that you use a on-line website that allows you to take some tests, quizzes and other exams. Getting the older book, will save you money, so you will be able to purchase the other software. The access code is \$55, if you want the eText/eBook included, then it is \$110 and that will include the 9th edition. The My Mastering A P website, is good for 1 year. If you take AP1 in spring, you will still be able to use your Mastering A P on the same access code if you take AP2 in the fall. Do not be fooled by changed pictures or rearrangement of chapters. Seriously, the human body has not changed in the past two years. We still have the same muscles and bones and, yes the kidneys still filter plasma. ;) 1 of 1 people found the following review helpful. Great book! Goes into so much detail about the ... By Kayla Jobbins Great book! Goes into so much detail about the different anatomy and Physiology of your body! The pictures are great and all are all very detailed which helps out a lot for tests that may be taken in the class room. This book also has chapter tests and review materials at the end of each chapter which is a great summary for what could potentially be on the test. Overall, one of the best anatomy books you could purchase with up to date information.

About the Author Elaine Marieb After receiving her Ph.D. in zoology from the University of Massachusetts at Amherst, Elaine N. Marieb joined the faculty of the Biological Science Division of Holyoke Community College. While teaching at Holyoke Community College, where many of her students were pursuing nursing degrees, she developed a desire to better understand the relationship between the scientific study of the human body and the clinical aspects of the nursing practice. To that end, while continuing to teach full time, Dr. Marieb pursued her nursing education, which culminated in a Master of Science degree with a clinical specialization in gerontology from the University of Massachusetts. It is this experience that has informed the development of the unique perspective and accessibility for which her publications are known. Dr. Marieb has given generously to provide opportunities for students to further their education. She funds the E. N. Marieb Science Research Awards at Mount Holyoke College, which promotes research by undergraduate science majors, and has underwritten renovation of the biology labs in Clapp Laboratory at that college. Dr. Marieb also contributes to the University of Massachusetts at Amherst, where she generously provided funding for reconstruction and instrumentation of a cutting-edge cytology research laboratory. Recognizing the severe national shortage of nursing faculty, she underwrites the Nursing Scholars of the Future Grant Program at the university. In January 2012, Florida Gulf Coast University named a new health professions facility in her honor. The Dr. Elaine Nicpon Marieb Hall houses several specialized laboratories for the School of Nursing, made possible by Dr. Marieb's generous support. Suzanne Keller Suzanne M. Keller began her teaching career while she was still in graduate school at the University of Texas Health Science Center in San Antonio, Texas. Inspired by her lifelong passion for learning, Dr. Keller quickly adopted a teaching style focused on translating challenging concepts into easily understood parts using analogies and stories from her own experiences. An Iowa native, Dr. Keller uses her expertise to teach microbiology and anatomy and physiology at Indian Hills Community College, where most of her students are studying nursing or other health science programs. Dr. Keller values education as a way for students to express their values through the careers they pursue. She supports those endeavors both in and out of the classroom by participating in her local Lions Club, by donating money to the Indian Hills Foundation to fund scholarships, and by financially supporting service-learning trips for students. Dr. Keller also sponsors children in need with gifts for the holidays. Dr. Keller is a member of the Human Anatomy and Physiology Society (HAPS) and the Iowa Academy of Science. When not teaching or writing, Dr. Keller enjoys reading, traveling, family gatherings, and relaxing at home under the watchful eyes of her two canine children.
