**David A. Woodman, Gerald D. Tharp : Experiments in Physiology (11th Edition)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Experiments in Physiology (11th Edition):

0 of 0 people found the following review helpful. Physiology class By hking I had to buy this book for my AP class. It came in good condition and worked well for what I needed. It was laid out in a nice manner and was easy to do assignments in. 0 of 0 people found the following review helpful. Yup By Greyson It's exactly what I wanted 0 of 0 people found the following review helpful. Nice book of physiology By Monica C. S. Cardoso The book is very well planned and usefull. Its a nice book to teach and study human physiology. The programs help with the experiments.

For laboratory courses in Human/Animal Physiology Noted for its clear language, logical information flow, and emphasis on developing critical skills, this versatile manual covers all of the material needed for a one-semester human or animal physiology laboratory course. Over 90 exercises are organized into 22 chapters that are suitable for a

two- to four-hour lab period. The Eleventh Edition incorporates inquiry-based components, including an Explain This feature, which asks you to thoughtfully consider the aim of each exercise that they perform, and also contains a new scientific inquiry and graphing Appendix making this a perfect complement to any book. Instructors may pair the lab manual with other technologies such as PhysioEx 9.1, PowerLab, Vernier, and BIOPAC to effectively engage you. This impressive collaboration between Woodman and Tharp gives instructors the opportunity to truly foster critical thinking skills and add a dynamic element to their laboratory courses.

About the Author David Woodman joined the project in the Eighth Edition and is now fully responsible for the manuscript revision, though Dr. Tharp remains a consultant as needed. David has used this manual in his own lab for over a decade and has a solid grasp of the content, style, and technology in the text, as well as the student interests, goals and challenges encountered in this course. Dr. Gerald Tharp is a retired professor of the University of Nebraska, Lincoln. He signed the contract for this title back in 1973, with Burgess Publishing Co. in Minneapolis, and the title was later passed to Macmillan Inc. of New York, which was succeeded by Prentice-Hall for the Eighth Edition in 2001. The Eighth Edition was the last time that Tharp actively participated in the revision process.
