Mark R. Edwards : Freedom Foods: Superior new Foods, low on the Food Chain for People, Producers and Our Planet before purchasing it in order to gauge whether or not it would be worth my time, and all praised Freedom Foods: Superior new Foods, low on the Food Chain for People, Producers and Our Planet:

Freedom foods reinvent our food supply from the foundation of the food chain to liberate us to make smart choices for healthier, delicious food. Food grown low on the food chain free us from the consumption, waste and pollution caused by modern industrial foods. Consumers do not have free choice today because Freedom Foods are not widely available. We need a revolution to transform our food supply. Freedom foods grow using abundance methods in peace microfarms. Abundance frees growers from fossil resources by using plentiful resources that will not run out -- sunshine, CO2 and waste, brine or ocean water. Peace microfarms are adaptable and scalable microcrop platforms that grow food sustainably, 20 to 30 times faster than industrial agriculture.
