**Radivoj V. Krstic : General Histology of the Mammal: An Atlas for Students of Medicine and Biology** before purchasing it in order to gauge whether or not it would be worth my time, and all praised General Histology of the Mammal: An Atlas for Students of Medicine and Biology:

0 of 0 people found the following review helpful. Do not buy the reprint; get the first edition instead By Philip Jeffery, MD Line drawings are more informed than photographs, and you won't find any histology line drawings that are more detailed than Krstic's. These are unique master works from a pre-digital era. This title emphasizes cell ultrastructure, while the companion title "Human Microscopic Anatomy" emphasizes human tissues. HOWEVER, this reprint is a terrible scanned reproduction. For five stars, find the first edition (1985) used and do not buy the reprint. I have attached scans of print details from the original and the reprint for comparison.

With a Foreword by Reiter R.J. Translated by Forster, S.
