Kimball Nill : Glossary of Biotechnology and Agrobiotechnology Terms, Fifth Edition before purchasing it in order to gauge whether or not it would be worth my time, and all praised Glossary of Biotechnology and Agrobiotechnology Terms, Fifth Edition:

The 5th edition of Glossary of Biotechnology and Agrobiotechnology Terms will be a significant expansion of the previous 4th edition. In the past decade, many new terms have been introduced due to the appearance and application of new crop plant breeding methods as well as technical advances in genetics, molecular biology, cell biology and agricultural research. The terms associated with important new technologies have been added to this new edition

including terms related to Zinc Finger Proteins, Transcription Activator-Like Effectors (TALEs), TALE Nucleases, Genome Editing, CRISPR/Cas 9 Gene-editing Systems, Oligonucleotide-mediated Mutagenesis, and RNA Interference, as well as hundreds of others. The 5th edition, like previous editions, will be useful for regulators of agricultural biotechnology around the world, customers, biotech patent officials, venture capitalists, and agbiotech company executives, as well as biopharmaceutical industries and academics.

About the Author Kimball Nill is the Director of Market Development for the Minnesota Soybean Research Promotion Council (Mankato, Minnesota). He has spent decades proactively detecting emerging overseas agricultural trade barriers, and moved to eliminate or counter them before U.S. soybean exports are adversely impacted. He holds a B.S. Chemistry degree from North Dakota State University, and an MBA degree from the Wharton School of Business.
