**From Ingramcontent :** Head and Neck Cytohistology with DVD-ROM (Cytohistology of Small Tissue Samples)  
before purchasing it in order to gage whether or not it would be worth my time, and all praised Head and Neck  
Cytohistology with DVD-ROM (Cytohistology of Small Tissue Samples):

Each volume in this richly illustrated series - Cytohistology of Small Tissue Samples, sponsored by the Papanicolaou Society of Cytopathology - provides an organ-based approach to the cytological and histological diagnosis of small tissue samples including fine-needle aspiration biopsy, cell block samples and core, pinch and forceps biopsies. Benign, pre-malignant and malignant entities are presented in a well-organized and standardized format supported

with high-resolution color photomicrographs, tables, tabulated specific morphologic criteria and appropriate ancillary testing algorithms. Example vignettes allow the reader to assimilate the diagnostic principles in a case-based format. This unique series strengthens the bridge between surgical pathology and cytopathology, providing the pathologist with the ability to diagnose small tissue samples with confidence.

About the Author Zubair W. Baloch, MD, PhD is Professor of Pathology and Laboratory Medicine, Perelman School of Medicine, University of Pennsylvania Medical Center, Philadelphia, PA, USA. Tarik M. Elsheikh, MD works at the Robert J. Tomsich Pathology and Laboratory Medicine Institute, Department of Anatomic Pathology, Cleveland Clinic, Cleveland, OH, USA. William C. Faquin, MD, PhD is Director of Head and Neck Pathology, Massachusetts General Hospital and Massachusetts Eye and Ear Infirmary, and Associate Professor of Pathology, Harvard Medical School, Boston, MA, USA. Philippe Vielh, MD, PhD works at the Department of Pathology, Institut Gustav Roussy, Villejuif, France.
