From Brand: Natural Energy Works : Heretic's Notebook: Emotions, Protocells, Ether-Drift and Cosmic Life-Energy, with New Research Supporting Wilhelm Reich before purchasing it in order to gage whether or not it would be worth my time, and all praised Heretic's Notebook: Emotions, Protocells, Ether-Drift and Cosmic Life-Energy, with New Research Supporting Wilhelm Reich:

1 of 2 people found the following review helpful. Five StarsBy Kathy H.Great book for all interested1 of 1 people found the following review helpful. Great addition to Reichian libraryBy Elizabeth MedinaI am reading this slowly and there are uber scientific articles but I am fascinated by the ones on better caring for babies and mothers in childbirth. Very well written. A very profound look into the origins of human violence that tends to prove that violence only arose later than we are made to believe.23 of 25 people found the following review helpful. Orgonomy

todayBy Melek PaotiIf you want to know what is going on in orgonomy today, this book is for you.Divided into four major chapters - sociology, microbiology, orgone biophysics, and cosmic orgone engineering - this compendium presents ongoing work in various fields of life energy research by therapists and scientists following in Reich's footsteps. It includes articles on therapy and healthcare, new archaeological findings supporting Saharasia (also available here at .com), protocells and bion (origin of life) research, on the concept of ether and how it relates to orgone, consciousness research, dowsing, reports about a cloudbusting project in Africa to end a long drought, plant growth experiments in the orgone accumulator, information on the orgone energy motor and free energy, and more.Impressive work, a true eye-opener!

A compendium of 30 different research articles, by an international group of 18 different scientists and scholars, validating and expanding upon the subject of Wilhelm Reich's amazing discoveries and related concepts. The fifth issue of the ongoing series, Pulse of the Planet, presents new research in the fields of biogenesis and experimental orgone biophysics, with insightful essays and research articles on a truly amazing range of subjects: On natural childbirth, sexuality, archaeological evidence on early human violence, Reich's orgonomic functionalism, exposes on Reich's detractors, Giordano Bruno's work, protocells and bion-biogenesis research, a fresh look at Dayton Miller's ether-drift discoveries, emotional effects in REG (psychokinesis) experiments, new methods for detection of orgone energy, dowsing research, orgone energy effects in low-level radiation, cloudbusting experiments in Africa, plant growth stimulation in the orgone accumulator, several papers on the orgone energy motor with a discussion on the implications of "free energy", plus UFO research, book reviews, and much more, with many striking photos and illustrations.
