Michael H. Ross, Gordon I. Kaye, Wojciech Pawlina : Histology: A Text and Atlas: With Cell and Molecular Biology before purchasing it in order to gage whether or not it would be worth my time, and all praised Histology: A Text and Atlas: With Cell and Molecular Biology:

The only combination text/atlas in histology. Now in an updated Fourth Edition, this best-selling text and atlas is a brilliant presentation of histologic descriptions and high-resolution, full colour digital micrographs. A stunning new art programme provides a level of visual detail that students won't find in any other histology text. FEATURES: - A distinct emphasis on relevant cell and molecular biology, which includes the most current data from significant studies - Chapter-ending atlas sections taht newly incorporate full colour and digital labelling for greater clarity - Functional Correlations boxes use specific examples to show relationships between structure and function - Newly

designed Clinical Correlations boxes that teach students how histology relates to clinical practice - Extensive text revisions that make content more readable and user-friendly This outstanding resource is now available with an image bank of all 800+ images from the text, with unlabelled and labelled versions included. JPGs are provided for downloading into presentation software, with PDFs for printing onto transparencies or paper
