**Frederic H. Martini, Michael J. Timmons, Robert B. Tallitsch : Human Anatomy (6th Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Human Anatomy (6th Edition):

I am hoping I can clear up some confusion. I just received the "Human Anatomy Physiology, Books a la Carte Plus MasteringAP with eText -- Access Card Package (9th Edition)". This package came with the Human Anatomy Physiology textbook, A Brief Atlas of the Human Body, Interactive Physiology 10-System Suite (CD ROM), and the Student Access Code for Mastering AP. If you need the whole package, this is the one to order. Also, it is important to note that the textbook comes 3-holed punched and you will have to put the pages in a 3-ringed binder. This book does not have a binding. I personally like this idea because if I know that we are going to be working on chapters 2 and 3 in class, then I only have to bring chapters 2 and 3 to class. I don't have to lug around the whole book. Also, it might be important to note that I ordered this book directly from and not from someone who is using to sell their book. If you order the hardcover book, you will only receive the textbook. The hardcover book (at the time of this review) does not come with the

Atlas, CD ROM, or the Access Code. When you read reviews, make sure to look at the review carefully to see exactly which book/package is being reviewed. When you look at the reviews for "Human Anatomy Physiology" it will show reviews from people who received the hardcover book, the kindle book, and the 3-holed punched book. These reviews are all mixed together. The review will tell you exactly which book/package is being reviewed. Personally I think this makes it very confusing but if you look carefully you will find the information you need. UPDATE as of 1/30/2013 I have just noticed that is now selling a loose leaf edition without the full package. When ordering make sure you order "Human Anatomy Physiology, Books a la Carte Plus MasteringAP with eText -- Access Card Package (9th Edition)" if you need the full package. If it doesn't list "Mastering AP with eText - Access Card Package" in the title then you are not going to receive the full package. Also, it seems like is making it more difficult to actually find this full package. If you search for just "Human Anatomy Physiology", this full package is not going to come up in the search. However, if you copy and paste the full title: "Human Anatomy Physiology, Books a la Carte Plus MasteringAP with eText -- Access Card Package (9th Edition)", you should be able to find the correct package. I hope you find what you need. Now that I have started my class that uses this book, I can now comment on using the Loose Leaf version vs a Hardcover book. Overall I do like that I can take a few chapters to class versus taking the whole book. Its much lighter and I enjoy that. The only bad thing I have found about having the loose leaf version is that you have to be more careful with the pages. The whole book is 3 holed punched and needs to be put in a 3 ring binder. When turning the pages, if you aren't careful, you can tear one or two of the holes on a page. It's usually nothing a little tape couldn't correct but if you are the kind of person who is rough on their books, turns pages aggressively, throws their books across the room, then you might want to invest in the hard cover book. 193 of 196 people found the following review helpful. fantastic book, but read my review first By Validus I purchased this book a few semesters ago and it is a great text book. This text book you will want to keep for future references. With that said.. Do yourself a favour and just get the past edition. I returned my 9th edition. I just do not see the justification to charge someone almost \$200 for a new book when the previous edition is almost the exact same, with just replacing of pictures. The 8th Edition can be purchased for less than \$15 bucks here on (ISBN-10: 0805395695 ). I am pretty certain that most college students are pretty much on the verge of being broke, or soon to be for that matter. Always try to get the previous edition if you can, your save a lot of money, around 1/5 the price. These publishers just drive me nuts, I understand they need to make money, but come on, most of these books are never completely rewritten and they come out with a new edition every 2-3 years and those editions like this one, are almost exactly the same, except for replacement of pictures and a few updated stories/examples. It seems crazy how a book that is just two years old seems to be considered no longer usable.--\*Update\*: For most AP students, your cover the first chapter all the way to the nervous system. In AP II your probably start with the Endocrine System. Your professor may require you to get Mastering A P. This requires that you use a on-line website that allows you to take some tests, quizzes and other exams. Getting the older book, will save you money, so you will be able to purchase the other software. The access code is \$55, if you want the eText/eBook included, then it is \$110 and that will include the 9th edition. The My Mastering A P website, is good for 1 year. If you take AP1 in spring, you will still be able to use your Mastering A P on the same access code if you take AP2 in the fall. Do not be fooled by changed pictures or rearrangement of chapters. Seriously, the human body has not changed in the past two years. We still have the same muscles and bones and, yes the kidneys still filter plasma. ;) 1 of 1 people found the following review helpful. Great book! Goes into so much detail about the ...By Kayla Jobbins Great book! Goes into so much detail about the different anatomy and Physiology of your body! The pictures are great and all are all very detailed which helps out a lot for tests that may be taken in the class room. This book also has chapter tests and review materials at the end of each chapter which is a great summary for what could potentially be on the test. Overall, one of the best anatomy books you could purchase with up to date information.

About the Author Dr. Frederic (Ric) Martini received his Ph.D. from Cornell University in comparative and functional anatomy for work on the pathophysiology of stress. His publications include journal articles and contributed chapters, technical reports, and magazine articles. He is the lead author of six other undergraduate texts on anatomy and physiology or anatomy, and has a feature column, Back to Basics, in Physician License and Practice Today, a quarterly publication for medical students and residents. He is currently affiliated faculty of the University of Hawaii at Manoa and remains connected with the Shoals Marine Laboratory, a joint venture between Cornell University and the University of New Hampshire. Dr. Martini has been active in the Human Anatomy and Physiology Society (HAPS) for 15 years, and was a member of the committee that established the course curriculum guidelines for AP. He is now a President Emeritus of HAPS after serving as President-Elect, President, and Past-President over 2004-2007. He is also a member of the American Physiological Society, the American Association of Anatomists, the Society for Integrative and Comparative Biology, the Australia/New Zealand Association of Clinical Anatomists, the Hawaii Academy of Science, the American Association for the Advancement of Science, and the International Society of Vertebrate Morphologists. Dr. Michael J. Timmons received his degrees from Loyola University, Chicago. For more than three decades he has had a strong commitment to teaching nursing and pre-professional students at Moraine Valley Community College. In 2005-2006 Professor Timmons was honored with the Professor of the Year Award by Moraine Valley College and the Excellence Award from the National Institute for Staff and Organizational Development for his outstanding contributions to teaching, leadership, and student learning. He was the recipient of the Excellence in Teaching Award by the Illinois Community College Board of Trustees. Professor Timmons has authored several anatomy and physiology lab manuals and dissection guides. His areas of interest include biomedical photography, crafting illustration programs, and developing instructional technology learning systems. He chaired the Midwest Regional Human Anatomy and Physiology Conference and is also a national and regional presenter at the League for Innovation Conferences on Information Technology for Colleges and Universities and at Human Anatomy and Physiology Society meetings. Dr. Robert B. Tallitsch received his Ph.D. in physiology with an anatomy minor from the University of Wisconsin-Madison at the ripe old age of 24. Since then, Dr. Tallitsch has been on the biology faculty at Augustana College in Rock Island, Illinois. His teaching responsibilities include Human Anatomy, Neuroanatomy, Histology, and Kinesiology. He is also a member of the Asian Studies faculty at Augustana College and teaches a course in Traditional Chinese Medicine. In seven out of the last nine years, Dr. Tallitsch has been designated as one of the unofficial teachers of the year by the graduating seniors at Augustana College. Dr. Tallitsch is a member of the American Physiological Society, American Association of Anatomists, AsiaNetwork, and the Human Anatomy and Physiology Society. In addition to his teaching responsibilities at Augustana College, Dr. Tallitsch has served as a visiting faculty member at the Foreign Languages Faculty at the Beijing University of Chinese Medicine and Pharmacology (Beijing, PRC), and the Foreign Languages Faculty at Central China Normal University (Wuhan, PRC).
