**Elaine N. Marieb, Patricia Brady Wilhelm, Jon B. Mallatt : Human Anatomy (8th Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Human Anatomy (8th Edition):

283 of 286 people found the following review helpful. Book Package came with everything that was neededBy CustomerI have seen a few comments/questions regarding what is included with this textbook. I am hoping I can clear up some confusion. I just received the "Human Anatomy Physiology, Books a la Carte Plus MasteringAP with eText -- Access Card Package (9th Edition)". This package came with the Human Anatomy Physiology textbook, A Brief Atlas of the Human Body, Interactive Physiology 10-System Suite (CD ROM), and the Student Access Code for Mastering AP. If you need the whole package, this is the one to order. Also, it is important to note that the textbook comes 3-holed punched and you will have to put the pages in a 3-ringed binder. This book does not have a binding. I personally like this idea because if I know that we are going to be working on chapters 2 and 3 in class, then I only have to bring chapters 2 and 3 to class. I don't have to lug around the whole book. Also, it might be important to note

that I ordered this book directly from and not from someone who is using to sell their book. If you order the hardcover book, you will only receive the textbook. The hardcover book (at the time of this review) does not come with the Atlas, CD ROM, or the Access Code. When you read reviews, make sure to look at the review carefully to see exactly which book/package is being reviewed. When you look at the reviews for "Human Anatomy Physiology" it will show reviews from people who received the hardcover book, the kindle book, and the 3-holed punched book. These reviews are all mixed together. The review will tell you exactly which book/package is being reviewed. Personally I think this makes it very confusing but if you look carefully you will find the information you need. UPDATE as of 1/30/2013 I have just noticed that is now selling a loose leaf edition without the full package. When ordering make sure you order "Human Anatomy Physiology, Books a la Carte Plus MasteringAP with eText -- Access Card Package (9th Edition)" if you need the full package. If it doesn't list "Mastering AP with eText - Access Card Package" in the title then you are not going to receive the full package. Also, it seems like is making it more difficult to actually find this full package. If you search for just "Human Anatomy Physiology", this full package is not going to come up in the search. However, if you copy and paste the full title: "Human Anatomy Physiology, Books a la Carte Plus MasteringAP with eText -- Access Card Package (9th Edition)", you should be able to find the correct package. I hope you find what you need. Now that I have started my class that uses this book, I can now comment on using the Loose Leaf version vs a Hardcover book. Overall I do like that I can take a few chapters to class versus taking the whole book. Its much lighter and I enjoy that. The only bad thing I have found about having the loose leaf version is that you have to be more careful with the pages. The whole book is 3 holed punched and needs to be put in a 3 ring binder. When turning the pages, if you aren't careful, you can tear one or two of the holes on a page. It's usually nothing a little tape couldn't correct but if you are the kind of person who is rough on their books, turns pages aggressively, throws their books across the room, then you might want to invest in the hard cover book. 193 of 196 people found the following review helpful. fantastic book, but read my review first. By Validus I purchased this book a few semesters ago and it is a great text book. This text book you will want to keep for future references. With that said.. Do yourself a favour and just get the past edition. I returned my 9th edition. I just do not see the justification to charge someone almost \$200 for a new book when the previous edition is almost the exact same, with just replacing of pictures. The 8th Edition can be purchased for less than \$15 bucks here on (ISBN-10: 0805395695 ). I am pretty certain that most college students are pretty much on the verge of being broke, or soon to be for that matter. Always try to get the previous edition if you can, your save a lot of money, around 1/5 the price. These publishers just drive me nuts, I understand they need to make money, but come on, most of these books are never completely rewritten and they come out with a new edition every 2-3 years and those editions like this one, are almost exactly the same, except for replacement of pictures and a few updated stories/examples. It seems crazy how a book that is just two years old seems to be considered no longer usable.--\*Update\*: For most AP students, your cover the first chapter all the way to the nervous system. In AP II your probably start with the Endocrine System. Your professor may require you to get Mastering A P. This requires that you use a on-line website that allows you to take some tests, quizzes and other exams. Getting the older book, will save you money, so you will be able to purchase the other software. The access code is \$55, if you want the eText/eBook included, then it is \$110 and that will include the 9th edition. The My Mastering A P website, is good for 1 year. If you take AP1 in spring, you will still be able to use your Mastering A P on the same access code if you take AP2 in the fall. Do not be fooled by changed pictures or rearrangement of chapters. Seriously, the human body has not changed in the past two years. We still have the same muscles and bones and, yes the kidneys still filter plasma. ;) 1 of 1 people found the following review helpful. Great book! Goes into so much detail about the ... By Kayla Jobbins Great book! Goes into so much detail about the different anatomy and Physiology of your body! The pictures are great and all are all very detailed which helps out a lot for tests that may be taken in the class room. This book also has chapter tests and review materials at the end of each chapter which is a great summary for what could potentially be on the test. Overall, one of the best anatomy books you could purchase with up to date information.

For one-semester courses in human anatomy. Helps readers visualize human anatomy The #1 best-selling book for the human anatomy course, Human Anatomy, Eighth Edition is widely regarded as the most readable and visually accessible book on the market. The book's hallmark strengths are detailed art that teaches better, a reader-friendly narrative, and easy-to-use media and assessment tools. These are enhanced through assignable anatomy animations and tutorials in MasteringAP, more prominent in-book media references, and updated Focus Figures. Within the book, photos reinforce real-world applications, and cadaver photos and micrographs appear side-by-side with art, working together to help readers accurately visualize key anatomical structures. For the Eighth Edition, new, essential digital resources in MasteringAP are more deeply integrated than ever throughout the text, making it easy for students to find helpful study tools. MasteringAP's interactive tools include adaptive Dynamic Study Modules; helpful videos on bone identification, organ dissection, and cat dissections; new Clinical Scenarios; and PAL 3.0. Note: You are purchasing a standalone product; MyLab Mastering does not come packaged with this content. Students, if interested in purchasing this title with MyLab Mastering, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and MyLab

Mastering, search for: 0134215036 / 9780134215037 Human Anatomy Plus MasteringAP with eText -- Access Card Package, 8/E Package consists of: 013433096X / 9780134330969 MasteringAP with Pearson eText -- ValuePack Access Card -- for Human Anatomy, 8/e 9780321869258 / 0321869257 A Photographic Atlas for Human Anatomy Physiology 0134243811 / 9780134243818 Human Anatomy, 8/e

About the Author For Elaine N. Marieb, taking the students perspective into account has always been an integral part of her teaching style. Dr. Marieb began her teaching career at Springfield College, where she taught anatomy and physiology to physical education majors. She then joined the faculty of the Biological Science Division of Holyoke Community College in 1969 after receiving her Ph.D. in zoology from the University of Massachusetts at Amherst. While teaching at Holyoke Community College, where many of her students were pursuing nursing degrees, she developed a desire to better understand the relationship between the scientific study of the human body and the clinical aspects of the nursing practice. To that end, while continuing to teach full time, Dr. Marieb pursued her nursing education, which culminated in a Master of Science degree with a clinical specialization in gerontology from the University of Massachusetts. It is this experience that has informed the development of the unique perspective and accessibility for which her publications are known. Dr. Marieb has partnered with Benjamin Cummings for over 30 years. Her first work was Human Anatomy Physiology Laboratory Manual (Cat Version), which came out in 1981. In the years since, several other lab manual versions and study guides, as well as the softcover Essentials of Human Anatomy Physiology textbook, have hit the campus bookstores. This textbook, now in its 10th edition, made its appearance in 1989 and is the latest expression of her commitment to the needs of students studying human anatomy and physiology. Dr. Marieb has given generously to colleges both near and far to provide opportunities for students to further their education. She contributes to the New Directions, New Careers Program at Holyoke Community College by funding a staffed drop-in center and by providing several full-tuition scholarships each year for women who are returning to college after a hiatus or attending college for the first time and who would be unable to continue their studies without financial support. She funds the E. N. Marieb Science Research Awards at Mount Holyoke College, which promotes research by undergraduate science majors, and has underwritten renovation and updating of one of the biology labs in Clapp Laboratory at that college. Dr. Marieb also contributes to the University of Massachusetts at Amherst where she generously provided funding for reconstruction and instrumentation of a cutting-edge cytology research laboratory. Recognizing the severe national shortage of nursing faculty, she underwrites the Nursing Scholars of the Future Grant Program at the university. In 1994, Dr. Marieb received the Benefactor Award from the National Council for Resource Development, American Association of Community Colleges, which recognizes her ongoing sponsorship of student scholarships, faculty teaching awards, and other academic contributions to Holyoke Community College. In May 2000, the science building at Holyoke Community College was named in her honor. Dr. Marieb is an active member of the Human Anatomy and Physiology Society (HAPS) and the American Association for the Advancement of Science (AAAS). Additionally, while actively engaged as an author, Dr. Marieb serves as a consultant for the Benjamin Cummings Interactive Physiology CD-ROM series. When not involved in academic pursuits, Dr. Marieb is a world traveler and has vowed to visit every country on this planet. Shorter term, she serves on the scholarship committee of the Womens Resources Center and on the board of directors of several charitable institutions in Sarasota County. She is an enthusiastic supporter of the local arts and enjoys a competitive match of doubles tennis. Patricia Brady Wilhelm received her Ph.D. in biological and medical sciences from Brown University and is currently Professor and Chair of Science at Johnson Wales University, Providence RI. She has taught human anatomy at Brown University, Rhode Island College, Community College of Rhode Island, and currently at the Center for Physician Assistant Studies at Johnson Wales University. Dr. Wilhelms commitment to teaching has been recognized throughout her career. In 1991 she received the Presidential Award for Excellence in Graduate Teaching from Brown University and in 2011 the Teaching Excellence Award from the Community College of Rhode Island. Dr. Wilhelms embraces innovation in the classroom and laboratory, incorporating Project Based Learning, POGIL activities, cooperative team-based dissection and other active learning strategies into her courses. The driving factor behind these innovations is the desire to aid student learning by making course materials accessible and to make the study of anatomy an active and interactive process. Dr. Wilhelm has shared her tools, techniques, experience, and enthusiasm for student success through professional presentations at national and regional meetings, including those of the Human Anatomy and Physiology Society (HAPS), the New England Biology Association of Two Year Colleges (NEBATYC), and Strategies to Success Conferences. In addition to teaching, Dr. Wilhelm contributes to the development and use of multimedia course tools for human anatomy instruction, is a contributing author and reviewer for a number of anatomy and physiology publications, and is a reviewer for Anatomical Sciences Education. She is a member of Sigma Xi, the Human Anatomy and Physiology Society, the American Association of Anatomists (AAA), and the PULSE (Partnership for Undergraduate Life Science Education) Community. Jon Mallatt earned his Ph.D. in Anatomy from the University of Chicago. Dr. Mallatt is currently an Associate Professor of Biological Sciences at Washington State University, where he has been teaching human anatomy to undergraduates of all backgrounds for 24 years. He is also a member of the department of Basic Medical Sciences, where he teaches courses in Histology and

Anatomy of the Trunk in the WWAMI Medical Program. WWAMI honored him with their "Excellence in Teaching Award" in 1992, 1993, 1995, and 2000. Additionally Dr. Mallatt holds a position as adjunct Associate Professor in the department of Biological Structure at the University of Washington. His particular areas of expertise in the study of anatomy are histology, comparative anatomy, and anatomical drawing, although his research now focuses on the origin of vertebrate animals and molecular phylogeny. Dr. Mallatt is an accomplished researcher with 39 publications in the fields of anatomy and molecular phylogeny to his credit.
