Cecie Starr, Beverly McMillan : Human Biology (with CD, Non-InfoTrac Version) before purchasing it in order to gage whether or not it would be worth my time, and all praised Human Biology (with CD, Non-InfoTrac Version):

0 of 0 people found the following review helpful. great for basic biology or medical classesBy robyn27xSchool book, great for basic biology or medical classes. Lots of useful information for any student.0 of 0 people found the following review helpful. Four StarsBy Monique MorganWas exactly what I needed and for a great price!!!0 of 0 people found the following review helpful. Five StarsBy Marissa VanDunkMy book came in great condition!!

The most comprehensive and understandable presentation of the biology of the human body, Starr and McMillan's Fourth Edition of HUMAN BIOLOGY continues with the same clarity of writing and profound instructive value of illustrations as in previous editions. Popular and respected, this book provides sound science in an accessible style, bringing concepts of biology into the context of students' own bodies and lives.

About the Author For the past two decades, Cecie Starr has been known as one of the best-selling biology textbook authors. Her texts, appreciated for their clarity in both the written word and the visual representation of biological concepts, include multiple editions of **BIOLOGY: THE UNITY AND DIVERSITY OF LIFE**, **BIOLOGY: CONCEPTS AND APPLICATIONS**, and **BIOLOGY TODAY AND TOMORROW**. Her original dream was to become an architect. Instead of building houses, she now builds, with care and attention to detail, incredible texts based on this philosophy: "I invite students into a chapter through an intriguing story. Once inside, they get the great windows that biologists construct on the world of life. Biology is not just another house. It is a conceptual mansion. I hope to do it justice." Beverly McMillan has been a science writer for more than 25 years and is coauthor of a college text in human biology, now in its eighth edition. She was worked extensively in educational and commercial publishing, including 8 years in editorial management positions in the college divisions of Random House and McGraw-Hill. In a multifaceted freelance career, Bev also has written or coauthored 10 trade books, as well as story panels for exhibitions at the Science Museum of Virginia and the San Francisco Exploratorium. She has worked as a radio producer and speechwriter for the University of California system and as science writer and media relations advisor for the Virginia Institute of Marine Science of the College of William and Mary. She holds undergraduate and graduate degrees from the University of California, Berkeley.
