Rodney A. Rhoades, Richard G. Pflanzer : Human Physiology (Non-InfoTrac Version) before purchasing it in order to gage whether or not it would be worth my time, and all praised Human Physiology (Non-InfoTrac Version):

0 of 0 people found the following review helpful. Necessary evilBy Scott manAlthough this book is helpful at times, it was only a recommended textbook for my course. The quiz questions at the end of each chapter are helpful, as are the different figures throughout the chapters, but if it weren't for the seller I got it from, it would have been far too expensive.0 of 0 people found the following review helpful. Awesome Seller!By melissaEven though this was considered a "Used" book, it was very clean, no bent pages, no stains, minimal highlighing. Awesome Seller!0 of 0 people found the following review helpful. Great!By GinaGreat shape and good price! Also shipment was on time :) No complaints really, the CD was included, but it was outdated, but that was not necessary

HUMAN PHYSIOLOGY, Fourth Edition presents physiology as a relevant and exciting discipline emphasizing many unanswered questions to stimulate critical thinking with an investigative approach. Concise chapters offer flexibility and more diversity than competing texts. The authors, distinguished physiologists, collaborate with ten other field

specialists to create the most accurate and current physiology text available. Unlike other titles in the area, each physiological system are written by a specialist in that area and the authors work to create one voice, a consistent presentation, high accuracy and up-to-date coverage. Users have come to expect the authoritative tone of this excellent textbook. Contributors in this 4th edition include: David Bell, Ph.D. of Fort Wayne Center for Medical Education Joe R. Haeberle, Ph.D. of the University of Vermont College of Medicine Stephen A. Kempson, PhD. Of Indiana University School of Medicine Bruce Martin Professor at Indiana University School of Medicine Richard A. Meiss, PhD. Indiana University School of Medicine Fredrick M. Pavalko, Ph.D. Indiana University School of Medicine Daniel E. Peavy, Ph.D. Indiana University School of Medicine George A. Tanner, Ph.D. Indiana University School of Medicine Wiltz W. Wagner, Ph.D. Indiana University School of Medicine.

1. The Science Of Physiology. Part I: CELLULAR FUNCTIONS. 2. Chemical and Physical Principles. 3. The Structure and Function of Cells. 4. Transport Through the Cell Membrane. 5. Cellular Control Mechanisms. 6. Energy and Cellular Metabolism. Part II: PHYSIOLOGICAL CONTROL SYSTEMS. 7. Functional Organization of the Nervous System. 8. Sensory Systems. 9. Motor Systems. 10. The Autonomic Nervous System. 11. Central Integrative Systems. 12. Endocrine Control Mechanisms. 13. The Pituitary Hormones. 14. The Adrenal Glands. 15. The Endocrine Pancreas. Part III: INTEGRATIVE ORGAN FUNCTIONS. 16. Muscle. 17. Functions of the Blood. 18. The Heart. 19. Circulation. 20. Respiration. 21. Pulmonary Circulation and Gas Exchange and Control of Breathing. 22. The Gastrointestinal System. 23. The Kidney. 24. Regulation of Fluid and Electrolyte Balance. 25. Regulation of Acid-Base Balance. 26. Calcium, Phosphate, and Bone Metabolism. 27. Regulation of Body Temperature. 28. Body Defense and the Immune Response. 29. Environmental Physiology. 30. Physiology of Exercise. 31. Reproductive Physiology. 32. Pregnancy, Fetal Development, and Lactation. 33. Sexual Physiology.About the AuthorRodney A. Rhoades, Ph.D. is Professor and Chair of the Department of Cellular and Integrative Physiology, Indiana University School of Medicine. He has an established career in physiological research, teaching, graduate training, and department administration. Professor Rhoades has over 25 years of teaching experience and has taught several thousand students at two major research universities. He has edited several textbooks in Physiology for both undergraduate and medical students. His area of expertise is respiratory physiology and his research has been supported by National Institutes of Health. He has written over 80 articles for scientific journals and has published several review chapters. His honors include a NASA fellowship, and a NIH Career Development Award. He has served on NIH study sections, editorial board for American. Journal of Physiology, and currently serves as ad hoc reviewer for several other professional journals. He has served two times on the National Board of Medical Examiners Physiology Test Committee, once as a committee chair. Professor Rhoades has also chaired and/or organized international symposia, and has been invited to speak at national and international meetings in physiology.Richard G. Pflanzer is Associate Professor of Biology at the Purdue University School of Science and Associate Professor of Cellular and Integrative Physiology at the Indiana University School of Medicine. He received his Ph.D. in Physiology from Indiana University in 1969 with research in comparative cardiovascular physiology. Dr. Pflanzer has authored many articles and books related to teaching physiology at the undergraduate, graduate, and professional levels, and is the recipient of several teaching awards, including Outstanding Teacher in Science at the Purdue University School of Science.
