Lorrie Klosterman : Immune System (Amazing Human Body) before purchasing it in order to gage whether or not it would be worth my time, and all praised Immune System (Amazing Human Body):

From BooklistFor this entry in the Amazing Human Body series, zoologist Klosterman opens with an unusually specific introduction to types of white blood cells and the organs of the immune system, goes on to describe maladies connected both to weakened and to hyperactive immune systems, then closes with advice about proper diet, hygiene, and health care. Illustrated with small but revealing micro- and macro-photographs and capped with relatively generous lists of appropriate print and Web resources, this will inform upper middle-grade students on a wide range of biological topics. Grades 6-9. --John Peters
