Warren Strober, Susan R. Gottesman : Immunology: Clinical Case Studies and Disease Pathophysiology before purchasing it in order to gage whether or not it would be worth my time, and all praised Immunology: Clinical Case Studies and Disease Pathophysiology:

0 of 0 people found the following review helpful. immunology clinical case studies is awesome.By Antonthis book is an excellent companion to the text, quite interesting. I dont appreciate having to write a review of this book, however!

26 real-life cases illustrate the applications of basic immunology in clinical settings May be utilized alone or as a companion to Immunology: A Short Course, 7th Edition by Richard Coico and Geofftry Sunshine (ISBN 9781118396919) Each case study is introduced by clearly written descriptions of the major immunological disorders Full colour photographs and illustrations complement complete presentation of real data Includes complete set of problems and discussion questions for each chapter

"In all, while written as a clinically-relevant companion for an immunology text, this book can stand alone as a wonderful resource for any clinical immunologist and can serve as an excellent teaching aid for anyone studying immunology or training in a field that cares for patients with immune disorders." (The World Allergy Organization, 1 August 2011) [This book] effectively accomplishes its stated goals. This well-written and easy-to-read book covers a wide variety of topics and provides a wealth of experience in a patient-oriented format. The editors of this book succeed in moving readers from beginning to end using this case-based approach. [This book] offers a number of teaching possibilities and could be useful in teaching immunology when combined with current textbooks. (JAMA, April 2010)

From the Back Cover The most up-to-date collection of immunology cases from world-class authorities in each disease entity This book offers a comprehensive, cutting-edge selection of real-life case studies for in-depth investigation into the impact of immunology on modern medical diagnosis and treatment. Twenty-six case studies effectively cover: immunodeficiency diseases, immediate hyper-sensitivity and mast cell disorders, autoimmune disorders, and malignancies of the lymphoid system. Each chapter presents a case study with a detailed background of the relevant immunological disorder, real data, references, and a conclusion, with interwoven discussion questions throughout. Each case study puts the individual patient into a larger context of the disease as it is seen in the patient population as a whole. Full-color photographs and illustrations complement the case studies, while a uniform presentation of the material across the book enhances readability. This book offers medical students and professionals the complete tools necessary to understand and evaluate common clinical scenarios, and to teach these clinical conditions to others. It may be used alone or as a companion to the widely acclaimed *Immunology: A Short Course*, Sixth Edition (Wiley).

About the Author Warren Strober, M.D., is Section Chief in the Laboratory of Clinical Investigation, Mucosal Immunity Section at the National Institute of Allergy and Infectious Diseases, National Institutes of Health. Susan R.S. Gottesman, M.D., Ph.D., is Associate Professor in the Department of Pathology at SUNY Health Science Center at Brooklyn.
