From Brand: Springer : Immunology of Silicones (Current Topics in Microbiology and Immunology) before purchasing it in order to gage whether or not it would be worth my time, and all praised Immunology of Silicones (Current Topics in Microbiology and Immunology):

This issue of *Current Topics in Microbiology and Immunology* records the proceedings of a Workshop on the Immunology of Silicones held at the Natcher Conference Center, National Institutes of Health, Bethesda, Maryland, March 13 and 14, 1995. A large number of investigators from North America and Europe met to discuss available data on how the immune system responds to silicones and related materials. Some aspects of this field are controversial. Nonetheless, the meeting was marked by a civil and open exchange of scientific information and divergent interpretations, reflecting the traditions of scientific communication. Each invited participant was asked to submit an article summarizing his/her presentation. Most of the papers are published as submitted, with only editorial changes to conform with the guidelines given to each contributor or revisions to clarify aspects of the paper. The papers should not be regarded as peer-reviewed publications. This preface will attempt to outline some of the immunological areas of investigation relating to silicones.
