From LWW : Infections of the Central Nervous System before purchasing it in order to gage whether or not it would be worth my time, and all praised Infections of the Central Nervous System:

The "gold standard" clinical reference on central nervous system infections is now in its thoroughly revised, updated Third Edition. More than 70 leading experts provide comprehensive, current information on all infections both neural-specific and systemic that involve the central nervous system. This edition includes new information on botulinum toxin as a biological weapon and a therapeutic agent, neurologic effects of viruses causing hemorrhagic fevers, and infections that have recently become more prevalent or been found in new geographic locations. The updated coverage of therapeutics includes AIDS/HIV medications and other antiviral drugs, new antifungal medications, and

vaccinations against Lyme disease and bacterial meningitis.
