Gail Woods, Vicki Schnadig, David Walker, Washington Winn Jr. : Infectious Disease Pathology: Clinical Cases before purchasing it in order to gage whether or not it would be worth my time, and all praised Infectious Disease Pathology: Clinical Cases:

1 of 1 people found the following review helpful. A great learning textBy C A TaylorI purchased this book to learn more about ID pathology. I do not have any significant background in infectious disease or pathology, but this text was very helpful in providing a great foundation for knowledge about this subject area.

This well-illustrated practical text provides information on the anatomic pathology of infectious diseases. Designed for the non-expert clinician and trainee, the book is organized by organ system and groups the discussion within each chapter according to the predominant type of host inflammatory response. Each chapter consists of a series of case studies that discuss clinical history, pathologic findings, microbiology, and the differential diagnosis. Host reactions

discussed in each chapter include minimal reaction, predominance of polymorphonuclear neutrophils, predominance of mononuclear cells, and granulomas. The appendices contain examples of the typical histologic findings associated with viral, fungal, and parasitic infections. The past decade has seen an increase in the number of exotic and unknown organisms and drug-resistant strains of conventional organisms, and it is essential that clinicians stay abreast of recent developments. *Infectious Disease Pathology: Clinical Cases* is the best tool for assisting physicians in the recognition of the wide range of infectious diseases contracted by patients.

About the Author Woods, Gail L, MD, Professor of Pathology and Director of Clinical Microbiology and Immunology, The University of Texas Medical Branch, Galveston Schnadig, Vicki J, MD, Associate Professor of Pathology and Associate Director of Division of Cytopathology, The University of Texas Medical Branch at Galveston, Galveston Walker, David H, MD, Professor and Chair of Pathology, The University of Texas Medical Branch at Galveston, Galveston Winn, Jr., Washington C, MD, University of Vermont College of Medicine, Burlington, USA
