**From Springer : Interdisciplinary Approaches to Nonlinear Complex Systems (Springer Series in Synergetics)**  
before purchasing it in order to gauge whether or not it would be worth my time, and all praised Interdisciplinary  
Approaches to Nonlinear Complex Systems (Springer Series in Synergetics):

Nonlinear dynamics is now recognized as playing a crucial role in a wide variety of disciplines. But what is only just beginning is the important process of cross fertilization and transfer of knowledge and expertise from one area to another. This book is intended to promote this process which will undoubtedly contribute greatly to furthering our understanding of complex systems. Contributions are provided by leading experts from the areas of sociology, cognitive science, chemistry, physiology, ecology, economics, neural networks and physics.
