BunkerThis is my favorite quote from a member of the Pharma Aristocracy: "Forgive this personal comment, but I got called out at eight o'clock for an emergency call and my daughter-in-law delivered a son by C-section. Our first male heir in the line of the next generation, and I do not want that grandson to get a thimerosal containing containing vaccine until we know better what is going on. It will probably take a long time. In the meantime, and I know there are probably implications for this internationally, but in the meanwhile I think I want that grandson to only be given thimerosal-free vaccines." Dr. Dick Johnston, the meeting chairperson and Immunologist and Pediatrician for the University of Colorado School of Medicine and National Jewish Center for Immunology and Respiratory Medicine. King Dick made this announcement about the royal prince at the CDC Simpsonwood Conference. You can find this gem on page 154. King Dick has no problem with the monkey pus, mouse brain, toxic metals being jabbed into the peasant babies, but the royal family will not participate. I love the poke in the eye writing style. Tremendous research! Thanks, Mr. Wilcox!8 of 9 people found the following review helpful. Jabbed for a Pulitzer!By Kent HeckenlivelyI was excited to read an advance copy of this wonderful book by Brett Wilcox. With an abundance of source material, an engaging writing style, and the type of good old-fashioned common sense we used to find our top journalists, Wilcox has written a book that should be read by every person in America.Kent Heckenlively, J.D.Co-Author of PLAGUE: One Scientist's Intrepid Search for the Truth About Human Retroviruses and Chronic Fatigue Syndrome (ME/CFS), Autism and Other DiseasesAuthor of upcoming book to be released on November 10, 2016, INOCULATED: How Science Lost Its Soul in Autism16 of 19 people found the following review helpful. Smart people ask questions. Be judicious for your children and read this book.By Lindey H. MageeSmart people ask questions. Smart people KNOW they must do the work; that they cannot rely on another-ANY other to make decisions for them or their children. THAT is where we have failed. We stopped being judicious. We have trusted too much.Government is corrupt. Corporations are corrupt. When a lie is the foundation of a pediatricians practice, that "vaccines are the single best thing I can offer my patients," it makes it very difficult for even doctors to entertain the idea that THIS IS REAL...Vaccines can and do cause harm and even death in some children.Vaccination, to me looks like a cult religion where doctors are the prophets, and the injection is the sacrament. Those practicing "vaccine religion" worship at the alter of modern science and throw all Christian morality, along with our freedom, to the wind. Brett paints this picture while simultaneously destroying the very foundation of lies and corruption that vaccine proponents stand on.Brothers and Sisters in Christ, Parent asking questions who is willing to do the work: read this book. It is packed with information, but easy to digest for even one who is just bringing to investigate. It will leave you enlightened and I pray- convicted to fight for our children, for freedom and for truth. Prayerfully you arrive to that conviction BEFORE your children are harmed. xoxo

The vaccine industry, medical establishment and government have convinced millions of people that vaccines are one of the greatest medical advancements in history. Consequently, believers believe in the salvational value of vaccines in much the same way that people of faith believe in the salvational value of religious sacraments. Germs are bad and vaccines are good. Period. Questioning the dominant paradigm results in shaming, scapegoating, and in some cases tainted reputations, lost careers or worse. Such an environment is not the domain of science; rather its the breeding ground of tyranny and fascism. Corporate and personal profits from the burgeoning vaccine pie depend upon the larger-than-life, myth-based vaccine paradigm. Sociopaths inject this paradigm into medical journals, medical curricula, congressional hearings, regulatory policies, White House statements, executive orders, and finally into the minds of vaccine believers. Million dollar sociopathic propaganda campaigns ensure that vaccine believers unleash their wrath against the vaccine informed, effectively keeping The Herd immune to the truth and ready and willing to roll up their sleeves to any and all vaccines currently on the schedule and to those yet to come down the vaccine pipeline. In spite of and in part because of the propaganda, the number of vaccine informed individuals is increasing. The day is soon coming when consumer distrust of vaccine sociopaths will gut the vaccine industry. Dont expect the sociopaths to roll over, play dead, and sacrifice their multi-billion dollar generating machine, however. Human bodies are, after all, their ATMs. The waves of coercive and mandatory vaccination laws that are rolling out across the USA and beyond demonstrate that if sociopaths are denied voluntary access to our bodies, they will take them by force. The force of law. A vaccine informed public is the only thing that will have the power to stop them and to hold them accountable for their crimes. Jabbed exposes the vaccine paradigm, provides an accurate accounting of the sordid history of vaccinations, details conflicts of interest, warns against the unethical policies and practices of the American Academy of Pediatrics, shines light on the complicity of medical professionals, highlights the story of William Thompson, the CDC whistleblower, and celebrates the powerful role the documentary film Vaxxed is playing in exposing government fraud and awakening the public. In short, Jabbed informs and immunizes against three of the most dangerous epidemics in history: tyranny, greed, and corruption.

This book is a must read especially if you still think vaccines are provably safe and effective! Stephanie Seneff, PhD, senior research scientist at the MIT Computer Science and Artificial Intelligence LaboratoryA brilliant book on the sordid history of infectious disease and vaccines. It confirms my own conclusions on this subject, in that no vaccine

prevents any infectious disease and that every vaccine poses serious dangers to public health. A must-read for all ages.
Shiv Chopra, DVM, PhD, former senior scientific advisor on vaccinations for Health Canada
