By Uftone1 As far as practice question books go, this is right on the money. There's tons of practice questions, split up by clerkship (which helps if you're studying for shelf exams). The explanations are good at showing not only why the correct answer is correct, but why the other options are wrong. I didn't give it 5 stars since the questions are a bit on the shorter side compared to the real board. But other than that, it's good review. Actually, my biggest complaint is not with the book per se, but that if you're serious about practicing for the boards, you're better off going with an online qbank. While they're more expensive than this Qbook, you get much more content, better explanations, and you can tailor your studying to your weak areas. But as far as QBooks go, I'd recommend this one. 1 of 1 people found the following review helpful. Good question review book for 3rd year shelf exam and Step 2. By lampshade327 I acquired

the Kindle version when was offering it for free and have found it very helpful. I have used this question review book for several 3rd year shelf exams and have found the questions to be comparable to the difficulty level of the shelf exams. I have used the electronic Kaplan QBank for Step I studying and these questions are written in the similar style with a clinical vignette and then explained answers. When used in conjunction with UWorld, Pretest and a general subject review book, all bases for studying for both 3rd year shelf exams and Step II. Depending on the section, there are up to four 50 question exams per subject matter. The electronic Kindle version is a good buy as well because of its cheaper price and its accessibility over a computer, iPad, Kindle, etc. Plus it is easier to search and you don't have to carry around a big book as Kaplan tends to have larger books. 0 of 0 people found the following review helpful. Good review for CS! By TSGood review for CS! Really great section about note writing that is extremely high yield. Practice cases are good, but take the Plan section with a grain of salt. They go a little over the top on some of their orders and recommend unnecessary tests and imaging that would lose points in CS!
