**Ted R. Johnson, Christine L. Case : Laboratory Experiments in Microbiology (11th Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Laboratory Experiments in Microbiology (11th Edition):

6 of 6 people found the following review helpful. Same as 10th editionBy ladyvp05I bought this book for around \$12 and the textbook for about \$10. I didn't want to pay \$350 for the newest edition. I checked my classmates book and this book is pretty much exactly the same as the newer edition. It was risky buying the old edition but the payoff in saving all that money is worth the risk.0 of 0 people found the following review helpful. Saved a ton of moneyBy TinkerbellPretty much the same as the newest edition for WAYYYY less. Very happy I bought this instead of the latest 200 edition. Was in excellent condition1 of 1 people found the following review helpful. Five StarsBy Sarah Colegreat price!

For general microbiology laboratory courses. Containing 57 thoroughly class-tested and easily customizable exercises, *Laboratory Experiments in Microbiology*, Eleventh Edition, provides engaging labs with instruction on performing basic microbiology techniques and applications for undergraduate students in diverse areas, including the biological sciences, allied health sciences, agriculture, environmental science, nutrition, pharmacy, and various pre-professional programs. The perfect companion to Tortora/Funke/Cases *Microbiology: An Introduction* or any introductory microbiology text, the Eleventh Edition features fourteen new Part-opening Case Studies that introduce students to a real world scenario or health-oriented case that connects the lab exercises to an engaging, familiar context. Updates to the new ASM BSL-2 safety lab protocol enhance flexibility and customization options for the instructor. MasteringMicrobiology's newly updated prelab quizzes along with MicroLab Tutors and Lab Technique Videos ensure students arrive prepared for each lab and provide additional review opportunities.

**About the Author** Ted R. Johnson is a professor of biology at St. Olaf College, a liberal arts college in Northfield, Minnesota, where he teaches courses in microbiology and immunology. He has taught at St. Olaf for 34 years and previously taught at Mankato State University. He received his masters degree and his Ph.D in microbiology from the University of Illinois in Chicago, Illinois. While at St. Olaf College, he has developed and directed several semester abroad and interim programs. His research focuses on the immune response to virally induced cancer in various animal models. Christine L. Case is a registered microbiologist and a professor of microbiology at Skyline College in San Bruno, California, where she has taught for the past 44 years. She received her Ed. D. in curriculum and instruction from Nova Southeastern University and her M.A. in microbiology from San Francisco State University. She was Director for the Society for Industrial Microbiology (SIM). She received the ASM and California Hayward outstanding educator awards and SACNAS Mentor award. In addition to teaching, Chris contributes regularly to professional literature, develops innovative educational methodologies, and maintains a personal and professional commitment to conservation and the importance of science in society. Chris is also an avid photographer, and many of her photographs appear in this lab manual.
