Description of product clearly stated that this copy had no markings and was in very good condition. The condition was great, however there are at least twenty to thirty pages with answers all written in the blanks. By the time I received the book, I had a homework assignment due and had no time to return to seller. The pages that are written on are written on with pencil, so I have had to go through and erase the answers one by one. Very inconvenient.1 of 1 people found the following review helpful.
