A. S. Packard : Life Histories of Animals, Including Man: Or Outlines of Comparative Embryology (Classic Reprint) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Life Histories of Animals, Including Man: Or Outlines of Comparative Embryology (Classic Reprint):

These condensed biographies of animals have grown out of a series of notes made originally for the writers own information. It then occurred that what had been found useful to him might prove of service to others, and accordingly they were printed from time to time in the American Naturalist for 1875. These papers are now offered to the public after undergoing careful revision, and with the addition of the chapters on Mammals and Man. It is hoped that in their present form, they will be useful as containing the outlines of Comparative Embryology, forming a book of reference for teachers and advanced students, designed to supplement text books of zoology and comparative anatomy, in which little or nothing is said of the modes of growth of animals, especially of the surprising changes undergone before birth. The embryology of the leading groups of the animal kingdom is treated of without reference to a rigid classification, which it was not the intention of the author to present in this connection. A large number of the illustrations engraved especially for the work have been drawn as a labor of love by Mr. S. E. Cassino, of Salem. Due acknowledgments of the sources from which they are copied are made in the text. Fbbody Academy op Science, Salem, Mass., Dec. 24, 1875.(Typographical errors above are due to OCR software and don't occur in the book.)About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology.Forgotten Books' Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings.
