**From CRC Press : Living Donor Transplantation** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Living Donor Transplantation:

Edited by leaders at one of the acclaimed transplant institutions in the United States, this reference covers all aspects of living donor solid organ and cellular transplantation in current clinical practice, including the kidney, liver, pancreas, lung, small bowel, islet, and hematopoietic stem cell transplantation. Detailed, engaging, and organ- and cell-specific chapters cover guidelines for donor and recipient selection and evaluation, recent surgical techniques, and an

assessment of donor risks and long-term patient outcomes.
