**Kathleen Park Talaro, Barry Chess Instructor : Loose Leaf Version of Foundations in Microbiology** before purchasing it in order to gage whether or not it would be worth my time, and all praised Loose Leaf Version of Foundations in Microbiology:

0 of 0 people found the following review helpful. GoodBy CustomerExactly how I expected. Was even delivered in a binder. Can tell it was used, which is why I ordered it to reduce price. Very glad I got it.0 of 0 people found the following review helpful. New in wrapper! Just what I needed for micro-bio ...By TeaWysoNew in wrapper! Just what I needed for micro-bio at a fraction of the cost. Is \$218 new at school bookstore.

Talaro/Chess: Foundations in Microbiology is an allied health microbiology text for non-science majors with a taxonomic approach to the disease chapters. It offers an engaging and accessible writing style through the use of tools such as case studies and analogies to thoroughly explain difficult microbiology concepts. The newest of these features includes the Secret World of Microbes and Quick Search. We are so excited to offer a robust learning program with student-focused learning activities, allowing the student to manage their learning while you easily manage their

assessment. Revised art and updated photos help concepts stand out. Detailed reports show how your assignments measure various learning objectives from the book (or input your own!), levels of Blooms Taxonomy or other categories, and how your students are doing. The Talaro Learning program will save you time while improving your students success in this course. Users who purchase Connect Plus receive access to the full online ebook version of the textbook, including SmartBook!

**About the Author** Barry Chess has been teaching microbiology at Pasadena City College for over 15 years. He received his Bachelors and Masters degrees from California State University, Los Angeles, and did several years of postgraduate work at the University of California, Irvine, where his research focused on the expression of eukaryotic genes involved in the development of muscle and bone. At Pasadena City College, Barry developed a new course in human genetics and helped to institute a biotechnology program. He regularly teaches courses in microbiology, general biology, and genetics, and works with students completing independent research projects in biology and microbiology. Over the past several years, Barry's interests have begun to focus on innovative methods of teaching that lead to greater student understanding. He has written cases for the National Center for Case Study Teaching in Science and presented talks at national meetings on the use of case studies in the classroom. In 2009, his laboratory manual, *Laboratory Applications in Microbiology: A Case Study Approach*, was published. He is thrilled and feels very fortunate to be collaborating with Kathy Talaro, with whom he has worked in the classroom for more than a decade, on this ninth edition. Barry is a member of the American Society for Microbiology and regularly attends meetings in his fields of interest, both to keep current of changes in the discipline and to exchange teaching and learning strategies with others in the field.
