Melinda S. Meade, Michael Emch PhD : Medical Geography, Third Edition before purchasing it in order to gage whether or not it would be worth my time, and all praised Medical Geography, Third Edition:

0 of 0 people found the following review helpful. but the rest of the book is excellent and engagingBy KrisThe first two chapters are drier than the Sahara, but the rest of the book is excellent and engaging. If it isn't required for your class, I would still recommend renting it. It's valuable for at-home study. It helped me understand some of the tougher concepts my teacher didn't cover in class.0 of 0 people found the following review helpful. University textbookBy HonestlyMeVery thorough, lots of information, college textbook.

The leading text in the field, this comprehensive book reviews geographic approaches to studying disease and public health issues across the globe. It presents cutting-edge techniques of spatial and social analysis and explores their relevance for understanding cultural and political ecology, disease systems, and health promotion. Essential topics include how new diseases emerge and epidemics develop in particular places; the intersecting influences on health of biological processes, culture, environment, and behavior; and the changing landscape of health care planning and service delivery. The text is richly illustrated with tables, figures, and maps, including 16 color plates.

"The third edition of this classic text is now even more accessible, and is a 'must have' for all interested in medical geography. In addition to the traditional disease ecology and environmental themes, the text presents exciting new information on current issues of concern such as globalization, disease, and development. It offers the finest treatment of the medical geography of developmental changes that I have seen. The text is ideal for medical geography, public health, and environmental health courses, as well as the burgeoning number of courses focusing on interdisciplinary and health issues."--Joseph R. Oppong, Department of Geography, University of North Texas
