Mildred Wernet Boyd RN MSN MSA, Barbara L. Tower RN MSN MA CCRN : Medical-Surgical Nursing (Book with Diskette) before purchasing it in order to gage whether or not it would be worth my time, and all praised Medical-Surgical Nursing (Book with Diskette):

0 of 0 people found the following review helpful. Received on time By Satisfied reader The book was received on time, and in good conditions...however the description of the book said that the book had a diskette, and the diskette was missing. I did not need the diskette and the fact that was missing did not affect me, but the listing should have said that the diskette was missing. Now for the price that I paid ...I got exactly what I was looking for. Thanks 3 of 3 people

found the following review helpful. I love this Series!! in fact I am Acing my Nursing TestsBy Willow WrightHere is the lowdown. Medical-Surgical Nursing is alot of material. This book puts the Data in Outline Form and highlights critical and key points. It comes with a diskette, I find most helpful in verifying my level of understanding. I bought the Lipincott's series as well but this is the book I use. I rarely refer to my textbook, because the narrative sometimes gets to be too much, leaving me swimming in facts. This book will NOT do that to you.4 of 4 people found the following review helpful. Awesome, the only nursing book I refer to now!By A CustomerRemember going through nursing school and the MOUNDS of reading to be done? This book is the best thing since sliced bread! Very to the point, great to do care plans by. A short sentence on patho, obj and subj signs and symptoms, tests related to illness; medical, pharm, and nursing care, I could go on and on. Great job on this one. I wouldn't do without it.

Covers cardiovascular disorders, respiratory disorders, neurologic disorders, sensory disorders (eyes and ears), gastrointestinal disorders, endocrine disorders, renal and urologic disorders, musculoskeletal disorders, integumentary disorders, hematologic and lymphatic disorders, and appendices.
