**From Springer : Medical Virology, Volume 10** before purchasing it in order to gage whether or not it would be worth my time, and all praised Medical Virology, Volume 10:

Twelve papers, and extracts of 20 others, from an October 1990 symposium in Newport Beach, California, discuss such subjects as the changing trends of diagnostic virology in a tertiary care medical center, host and transmission

factors in measles mortality, programmed antigenic stimulation as a new
