Gerard J. Tortora, Berdell R. Funke, Christine L. Case : Microbiology: An Introduction Plus MasteringMicrobiology with eText -- Access Card Package (11th Edition) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Microbiology: An Introduction Plus MasteringMicrobiology with eText -- Access Card Package (11th Edition):

0 of 0 people found the following review helpful. DONT BUY THE PAPERBACK!! ITS TOTALLY DIFFERENT THAN THE HARDBACK! By Rose DO NOT BUY THE PAPERBACK FROM PEARSON INDIA!! This textbook is TECHNICALLY the same as the hardcover. However, it is not the same at all. The glossary is in the front...not a big deal but it will throw you off. I didn't notice other differences until I started comparing mine to the hard covers texts my class mates had. ENTIRE chapters are different. Some aren't even in this book. Review questions are also different. This book is absolutely useless if your instructor isn't also using it. I assumed the paperback/hardcover would be the exact same book. But, they are not. I have a return pending but the seller is making me pay shipping even though the book was not as described. It's very frustrating. I have a test in a few days that I thought I was prepared for

and now I am actually behind. Please, save yourself the agony. DO NOT buy this in paperback. 0 of 0 people found the following review helpful. everything was great. However By Ms Jojo As far as the book being the correct edition and getting the book on time, everything was great. However, i bought the hardcover book new and it was damaged already. There were what seemed like bite marks on the edge of the book and small dents on the side of the cover. Also i wish i had known the access card was all the way in the back between last page and cover. Its not a big deal but i freaked out at first because i couldn't find it when i first opened the packaging. Everything else was fine. 3 of 3 people found the following review helpful. It was easy to understand By Diana TI used this book for the Fall 2015 semester. It was easy to understand. The tables helped out wen I was reading the chapters, and the drawings were exceptional! Great textbook! I am glad my instructor chose this.

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab Mastering products. Packages Access codes for Pearson's MyLab Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. -- This #1 selling non-majors microbiology textbook is praised for its straightforward presentation of complex topics, careful balance of concepts and applications, and proven art that teaches. In its Eleventh Edition, Tortora, Funke, and Cases Microbiology: An Introduction helps you make the connection between microbiology and human health. This edition continues to incorporate the latest in microbiology research and includes more features designed to engage you and promote critical thinking. With the complex and extensive information presented in introductory microbiology courses, demonstrating the connections between processes you cant see with your naked eye and diseases you will encounter in future careers can be challenging. Microbiology: An Introduction guides you through the process of disease diagnosis, aided by the practical application of the new Clinical Cases that are integrated through every textbook chapter. The text, complemented by MasteringMicrobiology, provides new MicroLab Tutors that help you prepare, practice, and maximize your lab time. To take learning beyond the classroom, new assignable Mastering content appeals to students, helping them understand how microbiology works and why its important reinforcing textbook lessons with interactive coaching activities and tutorials of the foundation figures, case studies and additional features.

About the Author Gerard J. Tortora is a professor of biology and teaches microbiology, human anatomy, and physiology at Bergen Community College in Paramus, New Jersey. He received his M.A. in Biology from Montclair State College in 1965. He belongs to numerous biology/microbiology organizations, such as the American Society of Microbiology (ASM), Human Anatomy and Physiology Society (HAPS), American Association for the Advancement of Science (AAAS), National Education Association (NEA), New Jersey Educational Association (NJEA), and the Metropolitan Association of College and University Biologists (MACUB). Jerry is the author of a number of biological science textbooks. In 1995, he was selected as one of the finest faculty scholars at Bergen Community College and was named Distinguished Faculty Scholar. In 1996, Jerry received a National Institute for Staff and Organizational Development (NISOD) excellence award from the University of Texas and was selected to represent Bergen Community College in a campaign to increase awareness of the contributions of community colleges to higher education. _____ Berdell R. Funke received his Ph.D., M.S., and B.S. in microbiology from Kansas State University. He has spent his professional years as a professor of microbiology at North Dakota State University. He taught introductory microbiology, including laboratory sections, general microbiology, food microbiology, soil microbiology, clinical parasitology, and pathogenic microbiology. As a research scientist in the Experiment Station at North Dakota State, he has published numerous papers on soil microbiology and food microbiology. _____ Christine L. Case is a registered microbiologist and a professor of microbiology at Skyline College in San Bruno, California, where she has taught for the past 38 years. She received her EdD. in curriculum and instruction from Nova Southeastern University and her M.A. in microbiology from San Francisco State University. She was Director for the Society for Industrial Microbiology (SIM). She received the ASM and California Hayward outstanding educator awards. In addition to teaching, Chris contributes regularly to professional literature, develops innovative educational methodologies, and maintains a personal and professional commitment to conservation and the importance of science in society. Chris is also an avid photographer, and many of her photographs appear in this book.
