This book contained writing when I received the supposedly "new" book. There are a few pages with pencil on it. I used to work at a textbook store. If you see ANYTHING you're supposed to mark it. Obviously someone at their company wasn't doing a thorough job.0 of 0 people found the following review helpful. No experiment discussion questionsBy AliaAfter each experiment, every lab manual has discussion questions and thats whats usually required for a student to hand in to the professor. literally all those questions were ripped off. I had to copy 20 something pages because of it.0 of 0 people found the following review helpful. It was okayBy Tyler Mowerokay condition it was not in the best condition and was not the book I needed. But it was ok

All experiments are correlated to Nester's Microbiology: A Human Perspective, 6/e, but can be used with any non-majors/allied health microbiology textbook.
