Matthew Grisham PhD : Microbiology PreTest Self-Assessment and Review 14/E before purchasing it in order to gauge whether or not it would be worth my time, and all praised Microbiology PreTest Self-Assessment and Review 14/E:

0 of 0 people found the following review helpful. Five Stars By paulette riley this is excellent try it 0 of 0 people found the following review helpful. Four Stars By Customer Good but questions are by microorganisms and not by systems 0 of 0 people found the following review helpful. Great service By Saolisa The product came as expected no hassle at all.

PreTest is the closest you can get to seeing the test before you take it Great for course review and the USMLE Step 1! Microbiology: PreTest asks the right questions so you'll know the right answers. Open it and start learning what's on the test. 500 USMLE-style questions and answers What you really need to know for exam success Detailed explanations for right and wrong answers Tested and reviewed by students who recently passed their exams student tested and reviewed "I found the questions included in this book extremely well written. They covered the high-yield material of each subject and will help students better prepare for the Step 1 exam." -- Jodie Bachman, Third-Year Medical Student, University of Medicine Dentistry of New Jersey School of Osteopathic Medicine "I liked this book. I feel that I would have benefited from using it during my own Step 1 study time." -- Russel Kahmke, Third-Year Medical Student, SUNY Upstate Medical University

About the Author Frank J. Lichtenberger, MD, PhD is a Fellow in Allergy/Immunology at the NIH. He completed his internal medicine residency at UT-Southwestern Medical Center, earned his MD from The Ohio State University School of Medicine, and earned dual PhDs in Immunology and Philosophy at The Ohio State University. Dr. Lichtenberger taught MCAT review for The Princeton for 7 years and lectures on immunology for Falcon Physician's live course; as a result he is uniquely attuned to student learning needs and is easily able to translate complicated immunologic concepts into understandable and memorable "chunks" for students.
