Lars Edvinsson : Migraine and Headache Pathophysiology before purchasing it in order to gage whether or not it would be worth my time, and all praised Migraine and Headache Pathophysiology:

Migraine Pathophysiology provides an overview of current and accepted methodologies for the experimental study of migraine of primary headache syndromes in the laboratory in animals and man. It gives the reader a view of the current status and direct basic scientists and the pharmaceutical industry in choosing experimental situations for developing new therapies.

About the Author[PhD MD] - Director of the Molecular Vascular Research Laboratory and University Lecturer, Lund University; Professor of Neurobiology
