Thierry A. G. M. Huisman MD, Claudia M. Hillenbrand PhD : MRI of the Newborn, Part 2, An Issue of Magnetic Resonance Imaging Clinics, 1e (The Clinics: Radiology) before purchasing it in order to gage whether or not it would be worth my time, and all praised MRI of the Newborn, Part 2, An Issue of Magnetic Resonance Imaging

Clinics, 1e (The Clinics: Radiology):

Vast experience has been gained over the past decade in safely transporting, monitoring, and imaging neonates, a highly vulnerable patient group. Technological advances in MRI hardware such as higher field strength systems, multi-channel coils, higher gradient performance, and MR compatible incubators with integrated antennae laid the ground for more detailed, higher resolution anatomical MR imaging. This issue provides separate reviews on the use of MR imaging in the evaluation of encephalopathy, postmortems, spinal dysraphia, and inflicted brain injury as well as neonatal neuro MR imaging and MR-guided cardiovascular interventions.
