**Ian Roddie, William Wallace : Multiple Choice Questions in Human Physiology, 5Ed: With Answers and Explanatory Comments** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Multiple Choice Questions in Human Physiology, 5Ed: With Answers and Explanatory Comments:

With over 600 question stems each with five branch questions and answers, 'Multiple Choice Questions in Human

Physiology', gives students over 3000 opportunities to test themselves. It aims to aid the understanding of how the body normally works and how its function is disturbed by various diseases. Both basic physiology and its application to clinical problems are covered. Students preparing for finals and professional examinations will find this an invaluable resource.

"A comprehensive review for the student of physiology, and because of its exhaustive nature, it also serves as a supplementary teaching aid designed to fill the gaps in the reader's knowledge. Mock timed examinations provide opportunity for self-assessment....Good aid for the teacher who occasionally needs to compare, modify, or beef up his or her own question pool."--Doody's Journal  
About the Author Ian C. Roddie, Professor of Physiology, Queen's University of Belfast (Emeritus). William F. M. Wallace, Consultant in Physiology, Belfast City Hospital; Professor of Applied Physiology, Queen's University of Belfast.
