Navdeep Chandel : Navigating Metabolism before purchasing it in order to gage whether or not it would be worth my time, and all praised Navigating Metabolism:

0 of 0 people found the following review helpful. Five StarsBy Customerexcellent book3 of 4 people found the following review helpful. Highly recommended for students and others seeking a deeper understanding ofBy JVA timely book given the recent resurgence in interest in metabolism in cancer biology, immunology and other areas. Remarkably readable for an often complex subject. Highly recommended for students and others seeking a deeper understanding of metabolism2 of 3 people found the following review helpful. very good foundation for mitochondrial based eukaryotic cells.By Brandon BurkeI love how it describes the cellular clock and the biological rhythms.This

book is awesome.

Complex metabolic pathway diagrams are a hallmark of many biochemistry textbooks. But what do they tell us about disease, physiology, cell signaling, aging, immunity, and gene expression? In a refreshing approach to the subject of metabolism, *Navigating Metabolism* provides a conceptual framework for navigating these pathways, showing how cells generate energy and synthesize cellular constituents and then further relating metabolic reactions to molecular, genetic, and signaling underpinnings. These principles are supported by copious illustrations that clearly represent metabolic reactions, making them accessible and relating them to the ways in which cells respond to stimuli to produce specific biological outcomes. The last few decades have brought metabolism to the fore, with new results suggesting that it plays a regulatory role in signaling pathways and gene expression. Viewing metabolism in this new light provides hope that it may be an avenue for providing effective prevention and targeted treatment for many of the diseases that plague us--cardiovascular, inflammatory disease, diabetes, and cancer. Authored by Navdeep Chandel, a leading investigator in the field, *Navigating Metabolism* is the perfect introduction to this modern view of metabolic studies.

About the Author Navdeep S. Chandel is a Professor in the Department of Medicine and Cell Biology at Northwestern University. He received a BA in Mathematics and a PhD in Cell Physiology at the University of Chicago. Dr. Chandel is well recognized for his work on the role of mitochondria as signaling organelles.
